User Guide for My Application

1. Introduction

Welcome to our application! This user guide will help you navigate through the various functionalities and features of our system. Our application is designed to assist users in managing items, processing orders, and handling customer inquiries effectively.

2. Getting Started

To access our application, simply navigate to the provided URL or open the application on your local machine if it's deployed locally. Upon accessing the application, you will be directed to the login page.

3. Login and Registration

- **Login:** If you already have an account, enter your email and password to log in.
- **Registration:** If you're a new user, click on the "Sign Up" link to register. Fill in the required information such as name, email, and password, then click "Register".

4. Dashboard

Once logged in, you will be directed to the dashboard page. The dashboard is the main interface of our application. Here, you will find several features and options, including:

- **View and manage items:** You can view a list of available items, update item details, and delete items if necessary.
- **Process orders:** You can view a list of orders and process them accordingly.
- **Contact Us:** You can submit inquiries or messages to the administrator through the contact form.

5. Admin Panel

If you log in using the email "admin@gmail.com", you will be directed to the admin panel. The admin panel is a specialized section of the dashboard reserved for administrative tasks. It provides additional functionalities for users with administrative privileges, including:

- **Access to all features:** Administrators have full access to all functionalities of the application, including managing items, processing orders, and handling inquiries.
- **Enhanced control:** Administrators can perform advanced operations such as creating new user accounts, assigning roles and permissions, and generating reports.
- **Security features:** The admin panel includes security features such as user authentication, role-based access control, and audit logs to ensure the security and integrity of the system.

- **Managing Items** In the "Items" section of the dashboard, you can perform the following actions:
 - View all available items: Browse through a list of items with details such as name, price, quantity, and image.
 - Update item details: Click on the "Update" button next to an item to modify its details, including name, price, quantity, and image.
 - Delete items: Click on the "Delete" button next to an item to remove it from the inventory.
- **Processing Orders** In the "Order Items" section of the dashboard, you can:
 - View a list of orders: See the items that customers have ordered.
 - Process orders: Click on the "Order" button next to an item to process it and fulfill the customer's request.

Dashboard Interface:

The dashboard interface consists of several components:

- **Navigation Menu:** Located on the left side of the screen, the navigation menu allows users to switch between different sections of the application, including Home, Add Item, and About Us.
- **Notification Icon:** Positioned on the top right corner of the page, the notification icon displays the number of unread notifications. Clicking on the icon reveals a dropdown panel with notification details.
- **Logout Button:** Positioned at the bottom of the navigation menu, the logout button allows users to securely log out of the application.

1. **. Functionality:**

- The Home section provides an overview of users registered in the system.
- Users are listed in a tabular format, displaying their ID, name, email, and corresponding actions.
- Administrators can delete users by clicking the "Delete" button next to each user entry.

Add Item:

- The Add Item section allows administrators to add new items to the system.
- Users can input the name, price, and upload an image of the item using the provided form.
- Upon submitting the form, the item details are saved to the database, and a success message is displayed.

About Us:

- The About Us section provides information about the application and its purpose.
- This section may include details such as the application's development team, mission statement, and contact information.

Notification System:

- The notification icon alerts administrators to any important updates or events within the system.
- When there are unread notifications, a badge indicating the number of unread notifications is displayed.
- Clicking on the notification icon reveals a dropdown panel with a list of notifications, allowing administrators to view details and take appropriate actions.

6. Logging Out:

- To log out of the application, users can click on the logout button located at the bottom of the navigation menu.
- Upon clicking the logout button, users will be securely logged out of the application and redirected to the login page.

6. User Panel

If you log in using any other email, you will be directed to the user panel. In the user panel, you can:

- **View and manage your profile:** Update your profile information, change your password, and view your order history.
- **Browse and order items:** View a list of available items, add items to your cart, and place orders.

I. . Managing Items

In the "Items" section of the dashboard, you can perform the following actions:

- **View all available items:** Browse through a list of items with details such as name, price, quantity, and image.
- **Update item details:** Click on the "Update" button next to an item to modify its details, including name, price, quantity, and image.

- **Delete items:** Click on the "Delete" button next to an item to remove it from the inventory.

II. Processing Orders

In the "Order Items" section of the dashboard, you can:

- **View a list of orders:** See the items that customers have ordered.
- **Process orders:** Click on the "Order" button next to an item to process it and fulfill the customer's request.

III. Contact Us

If you have any inquiries or messages for the administrator, you can use the "Contact Us" form. Simply fill in your name, email address, and message, then click the "Submit" button. Your message will be sent to the administrator for further action.

7. Additional Information

- **Security:** Our application ensures the security of your data by implementing secure authentication and encryption protocols.
- **Support:** For any technical issues or assistance, please contact our support team.

Conclusion

Thank you for using our application! We hope this user guide has provided you with a comprehensive understanding of its functionalities. This user guide provides a comprehensive overview of the Admin Dashboard and user Dashboard of the Application, including its various functionalities and usage instructions. By following this guide, administrators can effectively navigate the application and perform essential tasks to manage users and items efficiently.
